

javascript 对象

```
cat.name='Tim';  
cat['name']='Tim';  
cat.type='加菲猫';
```

删除对象的属性

```
delete cat.type;  
delete cat['type'];  
console.log(cat.type); //undefined
```

判断对象是否存在某属性

```
console.log('r' in cat); //false
```

遍历

```
for(var p in cat){  
    console.log(p); //打印属性名  
    console.log(cat.p); //返回undefined cat={p:'??'} 相当于cat['p']  
    console.log(cat[p]); //返回属性值  
}
```
